Printing.java

Include your IPO Chart with your code in Eclipse IDE: We will discuss and demonstrate this in the computer lab.

IPO CHART

Program name:	**Printing.java**	
INPUT	**PROCESS**	**OUTPUT**
Hint: What will the user input?	Hint: What is the program going to do with the input information?	Hint: What will the screen display after user input?
• The number of copies to be printed entered by the user (ex. 1001 or 678).	1. Prompt the user for the number of copies. 2. • Use an if-else if decision structure to determine the price per copy based on quantity brackets ($0–99$, $100–499$, $500–749$, $750–1000$, and > 1000). 3. • Calculate the total cost by multiplying copies by price per copy (totalCost = copies * pricePerCopy).	1. Displays the calculated price per copy. 2. Displays the total cost formatted as currency
