CountVowels.java

Include your IPO Chart with your code in Eclipse IDE: We will discuss and demonstrate this in the computer lab.

IPO CHART

Program name:	**AddCoins.java**	
INPUT	**PROCESS**	**OUTPUT**
Hint: What will the user input?	Hint: What is the program going to do with the input information?	Hint: What will the screen display after user input?
Text entered by user	1. Prompt and read the user's text string using inut.nextLine(). 2. Convert the input string to lowercase using .toLowerCase() to simplify vowel evaluations. 3. Initialize an integer counter variable (vowelCount = 0). 4. Run a for loop from index 0 up to lowerText.length() to examine each character via .charAt(i). 5. Use an if statement with logical OR operators (` 6. winning message	1. The input prompt: "Enter text: ". 2. The final result string showing the original text and the calculated vowel count (e.g., "The number of vowels in: -[text]- is: [count]..").

	and exit the loop.
