AddCoins.java

Include your IPO Chart with your code in Eclipse IDE: We will discuss and demonstrate this in the computer lab.

IPO CHART

Program name:	**AddCoins.java**	
INPUT	**PROCESS**	**OUTPUT**
Hint: What will the user input?	Hint: What is the program going to do with the input information?	Hint: What will the screen display after user input?
coin counts for quarters, dimes, nickels, and pennies.	1. Prompt the user to enter the number of quarters, dimes, nickels, and pennies. 2. Read and store each integer input using the `Scanner` object. 3. Calculate the total monetary value by multiplying each coin count by its respective value ($0.25, $0.10, $0.05, $0.01) and adding them together. 4. Print the final calculated total formatted with a dollar sign using string concatenation.	1. Displays prompts for each coin type (Enter quarters:, Enter dimes:, Enter nickels:, Enter pennies:). 2. Displays the final calculated total monetary value with a dollar sign 3.
