GuessingGame.java

Include your IPO Chart with your code in Eclipse IDE: We will discuss and demonstrate this in the computer lab.

IPO CHART

Program name:	**AddCoins.java**	
INPUT	**PROCESS**	**OUTPUT**
Hint: What will the user input?	Hint: What is the program going to do with the input information?	Hint: What will the screen display after user input?
User's guessed number entered repeatedly using their keyboard.	1. Get the secret target number (int secret = 4) and setting initial guess variable to 0. 2. Run a while loop that continues as long as userGuess != secret. 3. Prompt the user and read their integer input using input.nextInt(). 4. Compare userGuess to secret: 5. If incorrect, pass both values into the giveHint() method. 6. giveHint() checks if the guess is lower or higher and outputs the corresponding	1. Displays the prompt "Enter a number between 1 and 20: " when asking for the user's guess. 2. Displays a hint message ("Hint: try a higher number" or "Hint: try a lower number") if the guessed number does not match the secret number. 3. Displays the winning message ("You won!") when the correct number is guessed.

	direction hint. 7. 8. • If correct, output the winning message and exit the loop.
